Review: **Co-location** Datacenter Hosting Services

Agnitio Networks is your best choice for IT infrastructure co-location. Agnitio Network's hosting services are provided from carrier-class datacenter located in the heart of the City of Ottawa and hooked to national fiber-optic backbone via OC-192 & OC-48 transport system. This system carries voice and private-line data as well. We also provide services not available from most data centers, such as dedicated server hosting, managed services and security, and disaster recovery.

What's New?

- Peering with 245 Networks
- Multi-Homed Bandwidth (Tier 1 providers: 360/GT, Bell)
- FREE remote power cycling included
- Network attached storage
- Firewall Service
- Leased Dedicated Servers available (short provisioning)

Services

Agnitio Networks is Ottawa's Premier Co-location Service.

Co-location	
- Single Servers (Rack, Tower)	Managed Services (Hardware, Software)
- Rack Space (1/4, 1/2 or Full)	Bandwidth Options (Data, PRI, other)
- Cabinets (1/2, Full)	Dedicated Servers
- Private Suites	Backup & Recovery
	Load Balancing, Firewall

Co-location

Agnitio Networks offers a wide range co-location options from a single server to full rack or suite size installations in the class "A" datacenter. Dedicated space is provided for rack mounted or tower type servers. Agnitio Networks clients have virtually unlimited Internet bandwidth options.

The PRI TRUNK connectivity allows for VOIP or voice/data solution hosting.

Load balancing and Firewall services are available service options.

Customers are provided with online port monitoring tool to track their activity and usage.

Network and LAN is monitored 24/7 with immediate problem notification.

Phone lines and a range of telephony services are available.

Agnitio Networks can offer you Network, Security and Hardware support and consulting services.

Network Storage/Backup

Agnitio Networks provides Network Storage on RAID drives for co-locating customers data backup and storage. The backup servers are connected to your servers via a private network (2nd NIC card required). As a result, the data transfer is not counted toward your bandwidth usage, and the network is secure since the Network Storage servers are not publicly accessible on the Internet, but only through your server.

This backup service has managed and non-managed option. We also offer a tape backup solution.

Premium Managed Services

Agnitio Networks offers many additional services to dedicated server hosting and co-locating clients including monitoring, load balancing, as well as systems and LAN administration and management services on a consulting basis. All of these options are designed to add extra value to our hosting services and provide you with more complete and flexible solutions than other typical co-location facility or service.

Bandwidth

Because our Tier1 network providers have fiber and gigabit Ethernet equipment installed directly in the datacenter, Agnitio Networks can provide you with powerful bandwidth options. As a carrier class facility with voice/data services you can select from voice/data access options and many voice services that are available. Please, contact us for more details.

Dedicated Servers

In case your solution requires a Windows or Linux/Unix server to supplement your co-located equipment or Database hosting, we can have a server or database solution for you in a very short period of time! From Celeron to Dual Xeon models, preloaded with several of OS choices, dedicated servers can provide additional flexibility for your Internet infrastructure requirements and save you both time and money.

Other Services

- Webmaster administrative services and server management packages
- Server maintenance: updating server operating system and web server patches (Microsoft Windows, Linux, Unix)
- Off site backup tape storage and swapping
- Web statistics and Log files analysis
- Extra IP addresses as needed
- Switch level firewall service or packet filtering from the router level
- Professional staff with experience in Unix, Linux, Perl, CGI
- Accounts on Microsoft MS SQL, Media Player and Real Streaming Media servers

Extra Services Included

- Visual checks with phone support
- Reset cables
- Power cycles
- Domain name hosting
- Portable monitors and tools
- Provide reverse DNS services for all IP addresses
- Use of phone
- 10 POP e-mail accounts with browser-based access if needed
- Competent, friendly, expert service and staff
